

The Basics

School Recycling Workshop

Join fellow educators in a fun day of hands-on exploration digging into a topic that touches each of our lives every day. During this workshop, you will spend time as a detective, a paper maker, a worm farmer, and a water molecule as we uncover the awesomeness of something most of us want to get rid of as soon as possible. That's right, we're talking trash.

You'll never believe how interesting and useful solid waste lessons can be for meeting student learning expectations in a variety of subjects. Join us for this full-day workshop and leave with 6 hours professional development*, a head full of knowledge, and resources to help you share the learning.

★ **Sept. 19, 2016, 9 a.m. to 3:30 p.m.**

Best Western Inn of the Ozarks, Eureka Springs
